

Revised Total Coliform Rule (RTCR) Failure to Report Monitoring Events to the State that are Not Related to *E. coli*-positive Sample Results – Template 3-5

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Reporting Requirement(s) Not Met for MARTIN CREEK ESTATES

PWS 1260122

We are required to report the results of monitoring of your drinking water for specific contaminants on a regular basis by AUG 2019. Results of regular monitoring are an indicator of whether or not your drinking water meets health standards. During AUG 2019, we did not report the results of monitoring for total coliform.

Our system failed to notify the state drinking water program as required by AUG 2019. Although public health was not impacted, as our customers, you have a right to know what happened and what we did to correct the situation.

What should I do?

There is nothing you need to do at this time. You do not need to boil your water or take other actions.

What is being done?

While we did not notify the state as quickly as we should have, we reported the results on 09/18/2019 and were no longer in violation.
